

# Edenton National Fish Hatchery

## Phase II Striped Bass HACCP Plan

Updated 11/18/05

### Step 1 – Activity Description

Activity Description		
Project Leader:	Stephen Jackson	
Address:	1102 W. Queen St Edenton, NC 27932	Activity:  Fisheries
Phone:	(252) 482-4118	

Project Description
<p>Edenton NFH was authorized by Congress (71 Stat 264-July 7,1898) with the specific purpose of rearing warm water fish.</p> <p>The hatchery consists of approximately 63.59 acres of fee-title land. There are 36 ponds covering 25 acres of water. The hatchery has a public aquarium, and two fish holding/spawning facilities. A handicapped accessible boardwalk is in place and winds through a portion of bottomland hardwood forest terminating in a fishing pier for use by special needs persons.</p> <p>Water for production comes from a creek pump which delivers 1500 gals/min from Pembroke Creek; a deep well (600') delivers 600 gal/ min of saline water (3PPT). The holding house-spawning building receives fresh water from a well (200') at 400 gal/min.</p>

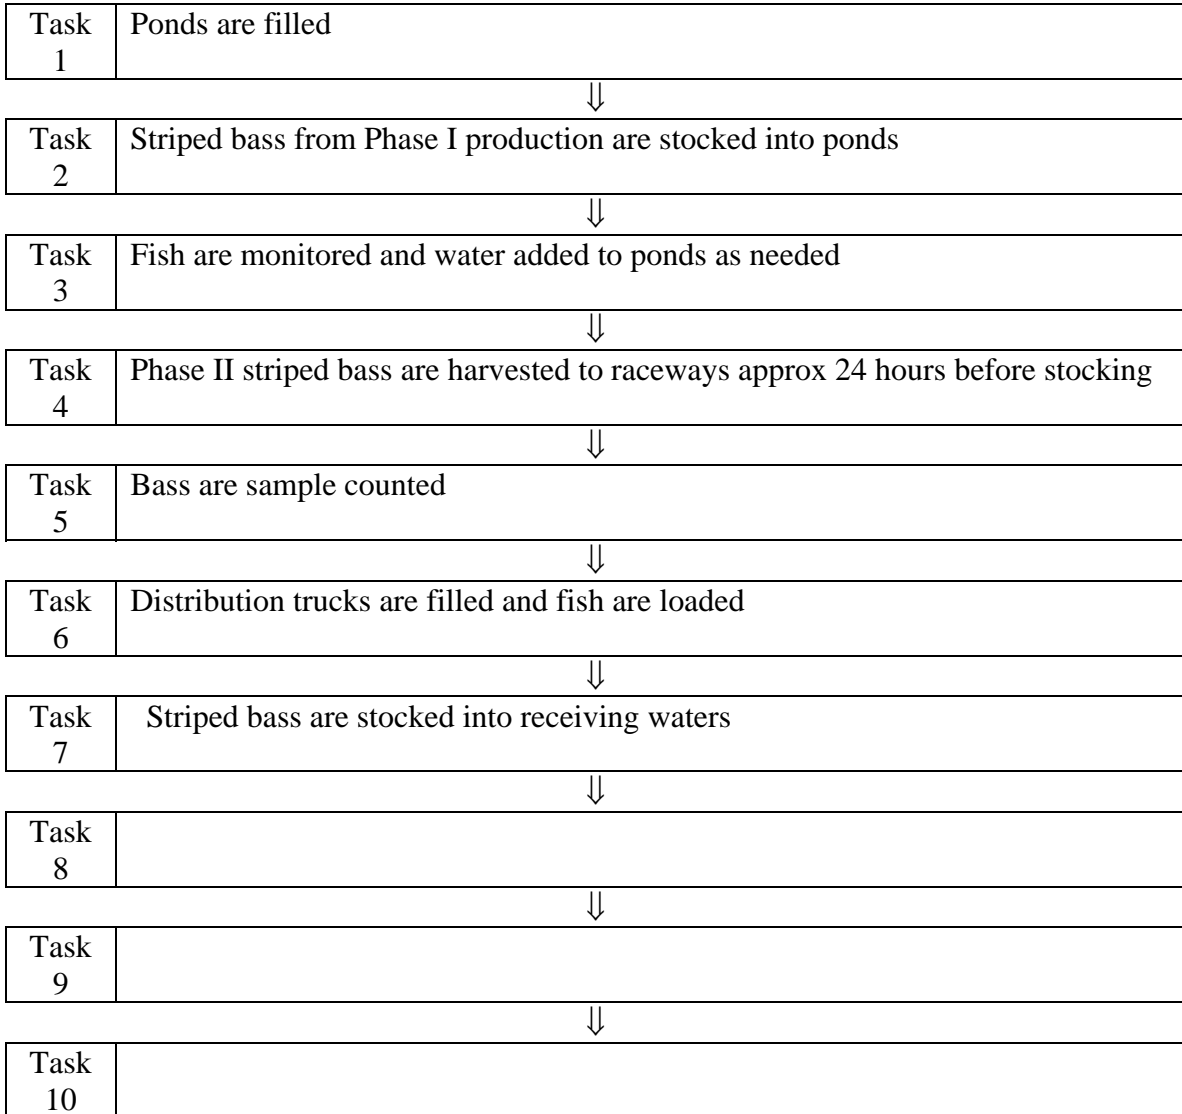

## Step 2 – Identify Potential Hazards

(to be transferred to column 2 of Step 4 – Hazard Analysis Worksheet)

<b>Hazards: Species Which May Potentially Be Moved/Introduced</b>
<b>Vertebrates:</b> Non-target fish species (various minnows, sunfishes, temperate basses, herrings, suckers, catfishes, and perches), amphibians, turtles
<b>Invertebrates:</b> Various pond shrimp species, crayfish, aquatic insects
<b>Plants:</b> Various algae and water plants
<b>Other Biologics (e.g. disease, pathogen, parasite):</b>
<b>Others (e.g. construction materials, etc.):</b>

### Step 3 – Flow Diagram

Flow Diagram Outlining Sequential Tasks to Complete Activity/Project  
Described in HACCP Step 1 – Activity Description

### Step 4 - Hazard Analysis Worksheet

1 Tasks (from HACCP Step 3 - Flow Diagram)	2 Potential hazards identified in HACCP Step 2	3 Are any potential hazards probable? (yes/no)	4 Justify evaluation for column 3	5 What control measures can be applied to prevent undesirable results?	6 Is this task a critical control point? (yes/no)
Task 1  Ponds are filled	<u>Vertebrates</u> Non-target fish species	No	Ponds are only filled with well water		No
	<u>Invertebrates</u>	No	Species are already in ponds, even when dry		
	<u>Plants</u>	No	Species are already in ponds, even when dry		
	<u>Others</u>	No			
Task 2  Striped bass from Phase I production are stocked into ponds	<u>Vertebrates</u>	Yes	Only if species get through Phase I Haccp Plan	Fish are graded and any non-targets removed before stocking	Yes
	<u>Invertebrates</u>	No	Species are already in ponds, even when dry		
	<u>Plants</u>	No	Species are already in ponds, even when dry		
	<u>Others</u>	No			

### Step 4 - Hazard Analysis Worksheet

1 Tasks (from HACCP Step 3 - Flow Diagram)	2 Potential hazards identified in HACCP Step 2	3 Are any potential hazards probable? (yes/no)	4 Justify evaluation for column 3	5 What control measures can be applied to prevent undesirable results?	6 Is this task a critical control point? (yes/no)
--	---	---	--------------------------------------	---	--

<b>Task 3</b>  Fish are monitored and water added to ponds as needed	<u>Vertebrates</u> Non-target fish species	No	Only well water is used to keep ponds filled.		No
	<u>Invertebrates</u>	No	Already in ponds		
	<u>Plants</u>	No	Already in ponds		
	<u>Others</u>	No			

<b>Task 4</b>  Phase II striped bass are harvested to raceways approx 24 hours before stocking	<u>Vertebrates</u> Non-target fish species, Amphibians, Turtles	Yes	Fish may be netted out of ponds along with striped bass.	Hand pick out non target species seen during harvest and in the harvest truck	No
	<u>Invertebrates</u> Various pond shrimp species, Aquatic insects	Yes	Animals may be netted out of ponds along with striped bass.	Hand pick out non target species seen during harvest and in the harvest truck	
	<u>Plants</u> Various algae and water plants	Yes	Plants/fragments may be netted out of ponds along with striped bass.	Hand pick out non target species seen during harvest and in the harvest truck	
	<u>Others</u>	No			

### Step 4 - Hazard Analysis Worksheet

1 Tasks (from HACCP Step 3 - Flow Diagram)	2 Potential hazards identified in HACCP Step 2	3 Are any potential hazards probable? (yes/no)	4 Justify evaluation for column 3	5 What control measures can be applied to prevent undesirable results?	6 Is this task a critical control point? (yes/no)
--	---	---	--------------------------------------	---	--

<b>Task 5</b>  Bass are sample counted	<u>Vertebrates</u>	Yes	Vertebrates missed in task 4 could still be in tanks	Hand pick non-target species, and give a salt treatment to STB	No
	<u>Invertebrates</u>	Yes	Invertebrates missed in task 4 could still be in tanks	Hand pick non-target species, and give a salt treatment to STB	
	<u>Plants</u>	Yes	Plants/fragments missed in task 4 could still be in tanks	Hand pick non-target species, and give a salt treatment to STB	
	<u>Others</u>	No			

<b>Task 6</b>  Distribution trucks are filled and bass are loaded	<u>Vertebrates</u>	No	Vertebrates missed in task 5 could still be in tanks	Hand pick non-target species, and load fish in salt bath	No
	<u>Invertebrates</u>	No	Invertebrates missed in task 5 could still be in tanks	Hand pick non-target species, and load fish in salt bath	
	<u>Plants</u>	No	Plants/fragments missed in task 5 could still be in tanks	Hand pick non-target species, and load fish in salt bath	
	<u>Others</u>	No			

### Step 4 - Hazard Analysis Worksheet

1 Tasks (from HACCP Step 3 - Flow Diagram)	2 Potential hazards identified in HACCP Step 2	3 Are any potential hazards probable? (yes/no)	4 Justify evaluation for column 3	5 What control measures can be applied to prevent undesirable results?	6 Is this task a critical control point? (yes/no)
--	---	---	--------------------------------------	---	--

<b>Task 7</b>  Striped bass are stocked into receiving waters	<u>Vertebrates</u>	No	Crop should have already been cleared of any potential problems		No
	<u>Invertebrates</u>	No	Crop should have already been cleared of any potential problems		
	<u>Plants</u>	No	Crop should have already been cleared of any potential problems		
	<u>Others</u>	No			

<b>Task 8</b>	<u>Vertebrates</u>				
	<u>Invertebrates</u>				
	<u>Plants</u>				
	<u>Others</u>				

**Step 5 – HACCP Plan Form**

<b>HACCP Plan Form</b>								
<b>Critical Control Point (CCP)</b>	<b>Significant Hazard(s)</b>	<b>Limits for each Control Measure</b>	<b>Monitoring</b>				<b>Evaluation &amp; Corrective Action(s) (if needed)</b>	<b>Supporting Documentation (if any)</b>
			<b>What</b>	<b>How</b>	<b>Frequency</b>	<b>Who</b>		
Task 2	Non-target fish species	Zero tolerance	Grading	Checked visually	Before stocking	All staff	When grading Phase I STB, remove any ANS by hand.
